#### SWEET AZALEA (*Azalea arborescens*)

Spicy fragrance, absolute hardiness, rich green foliage turning brilliant red in autumn give this choice native late flowering Azalea unusual garden merit. See pages 23 and 63.

#### ROSE DAPHNE (*Daphne cneorum*)

One of the choicest of all dwarf evergreens. In May the fragrant pink flowers come in greatest profusion. Splendid for rock garden or border. See page 17.

## CONIFEROUS EVERGREENS

The charm of conifers is in their variety of form, their dependability in giving beauty of color every month in the year and in their feeling of strength and ruggedness. In Winter harsh and bleak landscapes are enlivened and given a feeling of warmth by their dark beauty and gentle lines and in Summer they impart a sense of coolness. For formal or informal hedges, screens or windbreaks they are invaluable.

Care must be used in the choice, location and spacing of evergreens, for many, like most of the Hemlocks and the Firs will reach an eventual height of thirty to one hundred feet, while the Yews, some of the Arborvitae and many of the Junipers are dwarf or spreading in habit.

**More plantings are spoiled through crowding than through planting too sparsely—so allow plenty of room for future growth.**

We are glad to give expert advice to customers as to best varieties and proper treatment for each need and use.

**NOTE: Figures after the names are approximate heights reached by the trees and shrubs under favorable conditions, first under cultivation, and then in their native habitat.**

2½-3 ft. Spread	16.00

---

*caroliniana*, CAROLINA HEMLOCK. 30-70 ft. Introduced to cultivation by Harlan P. Kelsey. Prof. Sargent considered this "the handsomest conifer we can grow in New England." Unique in habit, with dark dense, tufted foliage on sweeping pendulous branches. It is hardier and more adapted to trying city atmospheres than the Canada Hemlock and seems to thrive in southern latitudes where the latter becomes thin, yellow and unsightly. No garden should be without this glorious evergreen. We have the finest stock of perfect specimens in America. All lift with fine balls due to frequent transplantings. It is unsurpassed as a hedge plant.

## BROADLEAF EVERGREENS Andromedas, Kalmias, Leucothoe, Rhododendrons, etc.

No ornamentals have become more deservedly popular than the Broadleaf Evergreens. Their beauty of flower and foliage promises added possibilities in the landscaping of your grounds.

All of the species that we list—and most of them are natives of the United States—are perfectly hardy as far north as Quebec, if given proper soil conditions and exposure or location.

Mass plantings of Rhododendrons, Mountainlaurel and Andromedas, with "filler" or "edging" plants, such as Leucothoe Heather, Rose Daphne and Sandmyrtle, are very desirable and probably show these Broadleaf Evergreens at their best. Such ground covers as Bearberry, Canby Pachistima and Japanese Pachysandra carpet the shady spaces luxuriantly.

To successfully grow these beautiful Broadleaf Evergreens, see that the soil is peaty, acid and well drained. Use a permanent mulch of Oak or other hardwood leaves (except Maple). A northern exposure is desirable, otherwise overhead leafy shade is essential. Ferns are at home in the Rhododendron bed and edgings of them or of Violets, Dicentras and a host of beautiful low ground covers give variety and beauty. Azaleas and Berrybearing Shrubs may be used freely in the planting with charming effects. We gladly aid customers in making up satisfactory combinations of "fillers" and other plant material for any proposed Rhododendron or Broadleaf planting.

## DECIDUOUS TREES AND SHRUBS

The deciduous trees and shrubs listed are varieties that have proved reliable for plantings as far north as northern New England and most are hardy in southern Canada.

This list includes many lovely rare and unusual trees and shrubs not generally available as well as the best standard varieties. We gladly assist customers in making up lists to ensure a continuous succession of flowers throughout the season, or for Autumn and Winter color effects, or for bird cover and the like.

**NOTE:** The heights shown after the names are approximate heights reached under favorable conditions, first under cultivation, and then in their native habitat.

Testing Grounds near Greenhouses

The testing of new or uncommon varieties to determine their value for garden use is an important feature of our service. Plant enthusiasts interested in this phase of horticulture will enjoy a visit to Kelsey-Highlands Nursery.

## MALUS, THE FLOWERING CRAB

The Flowering Crabs have few rivals among gorgeous Spring flowering trees and shrubs. At the Arnold Arboretum one of the most important events of the year is the blooming of the Crabs, followed by the showy fruit.

They are of easy culture, and whether planted singly or in masses, give remarkable and quick results. Not only are the Flowering Crabs beautiful on the lawn, but they are used to the greatest advantage on a large scale in woodland and other mass plantings, as are Dogwoods and Hawthorns. No group of plants has greater value for enlivening open forest parks and the country roadside. Most varieties are of greatest value as feed in winter for Pheasants, Grouse and other birds.

As soon as the ground can be worked in Spring is an ideal time for planting, and again in Fall after foliage is well ripened. Give rich soil and mulch heavily. Use all the water the soil will take in planting.

Prices of Flowering Crabs in Strong Specimens:

	Each	10
2-3 ft. ....	.60	5.40
3-4 ft. ....	1.00	9.00
4-5 ft. ....	1.25	11.25
5-6 ft. ....	2.00	18.00
6-7 ft. ....	3.00	27.00
7-8 ft. ....	5.00	45.00

The sizes we can supply follow the description of each variety. These prices are for strong plants, well developed for their height. For extra heavy specimens or selected individual plants charge is made to cover increased value.

**WASHINGTON ELM.** The late Jackson Dawson, noted Horticulturist, made grafts from a branch of the famous Cambridge Elm, under which George Washington took command of the Continental Army in 1775, thus saving for posterity true descendants of this historic tree, which since has been destroyed.

At the request of the founder of the Arnold Arboretum, the late Professor Charles Sprague Sargent, we have built up a stock of sturdy trees from this unique and authentic source and offer them at very reasonable prices to tree lovers who prize such treasures. A numbered certificate of authenticity and a permanent embossed metal marker is sent with each tree if desired.

## NAMED HARDY ASTERS

A fine collection of varieties, tall growing and dwarfs, that give charming effects in the garden. They bloom in New England during September and October. All pot grown plants.

\$ .30 each, \$ .75 for 3 except where noted.

ACME—Pale lavender,  $1\frac{3}{4}$  in. diameter, 3 ft. high, closely branching.

AUTUMN QUEEN—Lilac, 2 in. diam.,  $2\frac{1}{2}$  ft. high, erect.

BLUE EYES—Bluest of them all,  $1\frac{1}{2}$  in. diam., 3 ft. high, loosely branching. 50c each, \$1.25 for 3.

BURBANK'S CHARMING— $\frac{1}{2}$  in. diam., 4 ft. high, long, pendant sprays form plumes of soft pink. The very best late aster and defying frost. 50c each, \$1.25 for 3.

CHARLES WILSON, New—The reddest aster in the collection. 1 in. diam., 3 ft. high, erect habit. Outstanding because of its color and bright golden center. Superior to Red Rover which has been recommended previously in this color. Erect habit of growth makes supports unnecessary. 75c each.

DOROTHY VOKES—Clear rose, 1 in. diam., 2 ft. high, compact habit. 50c each, \$1.25 for 3.

EFFIE—Medium lavender,  $1\frac{3}{4}$  in. diam.,  $3\frac{1}{2}$  ft. high, fairly compact habit. Its large yellow center renders it very attractive. 75c each.

FREEDOM—Pale rose,  $1\frac{1}{2}$  in. diam.,  $3\frac{1}{2}$  ft. high.

HEATHER GLOW—Pink,  $1\frac{1}{2}$  in. diam., 3 ft. high, rather compact habit.

HON. VICARY GIBBS—Pale lavender,  $\frac{3}{4}$  in. diam.,  $2\frac{1}{2}$  ft. high, compact habit.

IVY LOGAN—Deep lavender,  $1\frac{1}{4}$  in. diam.,  $3\frac{1}{2}$  ft. high.

LADY LLOYD—Pale rose,  $1\frac{1}{4}$  in. diam.,  $3\frac{1}{2}$  ft. high, fairly compact habit.

MME. CARROY—Lavender,  $\frac{3}{4}$  in. diam.,  $1\frac{1}{2}$  ft. high, compact habit.

MRS. DAVIS EVANS—Clear lavender,  $1\frac{1}{2}$  in. diam., 3 ft. high, erect habit, very floriferous and this characteristic combined with its bright color makes it of excellent horticultural value. 50c each, \$1.25 for 3.

NORMA—Pale rosy lilac,  $1\frac{1}{4}$  in. diam., 3 ft. high, erect habit.

PEGGY BALLARD—Large sprays of rosy mauve flowers. 3 ft. high.

PERRY'S PRIDE—Clear pink,  $1\frac{1}{2}$  in. diam., 3 ft. high, loosely branching.

PERRY'S WHITE—Pure white petals which change to red with large golden center,  $1\frac{1}{4}$  in. diam.,  $3\frac{1}{2}$  ft. high, loosely branching.

ROBINSON, V. C.—Medium lavender,  $1\frac{1}{2}$  in. diam.,  $3\frac{1}{2}$  ft. high.

SAINT EGWIN—Pale rose, 1 in. diam.,  $2\frac{1}{2}$  ft. high, compact.

THORA PERRY—Pale lavender, 2 in. diam.,  $1\frac{1}{2}$  ft. high, compact habit.

VENUS—Deep lavender,  $\frac{1}{2}$  in. diam.,  $1\frac{1}{2}$  ft. high, compact habit. 50c each, \$1.25 for 3.

WHITE CLIMAX—Pure white, 4 ft. high.

WONDER OF STAFFA—Lavender,  $2\frac{1}{2}$  in. diam., 2 ft. high. 50c each, \$1.25 for 3.

SPECIAL OFFER. Collection of 24 different Named Hardy Asters, one of each variety listed above. Special collection (24 plants) \$7.50 (value \$9.00).

## HARDY NATIVE COLLECTED SHRUBS AND LOW GROUNDCOVERS

Americans are at last realizing how ruthlessly in the past nature has been man-handled and destroyed in the name of progress and profit, and that now it is imperative to again cover with beautiful native growth the waste places, roadsides and woodlands, so as to redeem our incomparable landscapes, prevent soil erosion, and give natural food and protection to our fast disappearing wild bird and animal life.

Nature's delicate equilibrium has been badly upset and should be restored unless floods, drought, insect pests and plant diseases are surely to overwhelm us.

Experts now agree that trees alone will not accomplish this and that the use of native shrubs and permanent low groundcovers in vast quantities is absolutely necessary.

Therefore for this purpose we are offering below a selected list of economical material in strong plants, clumps and sods. We are always glad to advise with customers on this important subject so they may secure the most satisfactory results.

## HARDY NATIVE COLLECTED RHODODENDRONS, AZALEAS AND MOUNTAINLAUREL FROM THE CAROLINA MOUNTAINS

The high Carolina Mountain district has always been the source of supply for the grand Native Broadleaf Evergreens and Azaleas. Harlin P. Kelsey was the first and for many years the only substantial source for these loveliest of hardy ornamental plants, many of which he introduced to cultivation.

As exclusive Agents for New England for the Farmer's Federation, Inc., Asheville, N. C., a mountain cooperative organization, we offer the highest grade of material sent out from that region, all heavy, fresh-dug clumps, carefully balled and burlapped. This super-grade stock is far superior to the usual mixed and light grades of collected stock usually sent out, and yet the prices are very reasonable. Do not be deceived, but buy and plant the best.

Address all orders and inquiries to:—

**HARLAN P. KELSEY, Inc.,  
Kelsey-Highlands Nursery,  
East Boxford, Massachusetts**

Prices below are for highest grade clumps, balled and burlapped. Only full carlot orders will be shipped direct from North Carolina, to your freight station. All less carlot orders will be shipped from Kelsey-Highlands Nursery, East Boxford, Mass.

**NOTE:** The minimum order accepted at these prices is \$100.00.  
On smaller orders add 20% to listed prices to cover additional cost of handling. On orders of \$500.00 or more deduct 10%.

## KELSEY'S SPECIAL LAWN GRASS SEED

In our complete horticultural and landscape service, we consider dependable grass seed a most important item. The mixtures we offer below contain the finest grade of seed in proper proportions. Our formulas are the fruit of experience and study of soil conditions and lawn needs of Northeastern United States. Best results come from early Spring sowing and again in August and September.

### Kelsey's SUPERLAWN Mixture.

A noteworthy mixture of finest perennial turf grasses and domestic rye-grass. Only seeds of high and tested quality are used. This formula is particularly designed for the neutral to acid soil almost universally found in the North Atlantic States. Sow one pound to 400 sq. feet.

1 lb.....\$ .50	5 lbs.....\$2.35	10 lbs.....\$4.50	25 lbs.....\$10.00
-----------------	------------------	-------------------	--------------------

### Kelsey's BENTLAWN Mixture.

This is a superb bent mixture which will produce a fine firm turf of unusual appeal. The Astoria Bent is carefully blended with other fine grasses so as to combine the elegance of a Bent lawn with the dependability of the less "fussy grasses". Sow one pound to 300 sq. feet.

1 lb.....\$1.00	5 lbs.....\$4.75	10 lbs.....\$9.00	25 lbs.....\$20.00
-----------------	------------------	-------------------	--------------------

### Kelsey's SHADYLAWN Mixture.

The shady spot in your garden requires a grass seed mixture especially designed for shade tolerance. Such a mixture is Kelsey's SHADYLAWN, a dependable blend of proven value. Sow one pound to 300 sq. feet.

1 lb.....\$ .75	5 lbs.....\$3.55	10 lbs.....\$6.75	25 lbs.....\$15.00
-----------------	------------------	-------------------	--------------------

### Kelsey's SHORELAWN Mixture.

Kelsey's SHORELAWN Grass Seed is a skillful blend of fine grasses from a formula of proven success on many North and South Shore estates, where acid and usually sandy soil, extreme exposure and salt spray are the rule. Sow one pound to 300 sq. feet.

1 lb.....\$ .75	5 lbs.....\$3.55	10 lbs.....\$6.75	25 lbs.....\$15.00
-----------------	------------------	-------------------	--------------------

### Kelsey's GREENLAWN Mixture.

For ordinary needs, where a high grade mixture such as Kelsey's SUPERLAWN is not required, Kelsey's GREENLAWN mixture will provide a splendid turf of unusual endurance. Sow one pound to 400 sq. feet.

1 lb.....\$ .35	5 lbs.....\$1.65	10 lbs.....\$3.15	25 lbs.....\$ 7.00

## LISTS OF PLANTS FOR SPECIAL ENVIRONMENTS

### PLANTS SUITABLE FOR ROCK GARDENS

EVERY Rock Garden has problems of its own. No list of this nature can in any way be complete—it can merely suggest a few of the varieties that are being successfully used in the finest American Rock Gardens. Herbaceous perennials are not included, as use of the various kinds depends on the type and size of the rock garden. We will gladly make recommendations of perennials to use for given types of rock garden.

### PLANTS FOR MOIST SOILS

MOST plants will not stand a location that is quite moist a great deal of the time. These varieties, however, do not seem to mind considerable moisture if proper drainage is provided. In many cases it increases their growth and gives them finer foliage.

Care must be used in choosing varieties that will best suit your particular location and we are prepared to help you plan correctly.

### BOG AND WATER PLANTS

Bog gardening is a most interesting phase of horticulture. Most of these plants will also thrive in moist upland soil.

<i>Acer rubrum</i>	<i>Betula nigra</i>	<i>Cimicifuga racemosa</i>
<i>Alnus rugosa</i>	<i>Calopogon pulchellus</i>	<i>Clethra alnifolia</i>
<i>Amelanchier oblongifolia</i>	<i>Caltha palustris</i>	<i>Cornus stolonifera</i>
<i>Andromeda glaucophylla</i>	<i>Calycanthus floridus</i>	<i>Cypripedium pubescens</i>
<i>Aronia arbutifolia</i>	<i>Chamaedaphne calyculata</i>	<i>Cypripedium spectabile</i>
<i>Azalea nudiflora</i>	<i>Chelone glabra</i>	<i>Epigaea repens</i>
<i>Azalea viscosa</i>	<i>Chelone lyoni</i>	<i>Eupatorium purpureum</i>

## PLANTS FOR DRY SOILS

OFTEN it is extremely difficult to find plants that will thrive in soil that is quite dry. These plants are among the best for such situations and when established seem to enjoy well-drained and rather dry soil.

<i>Acer negundo</i>	<i>Picea canadensis albertiana</i>	<i>Prunus pumila</i>
<i>Ailanthus glandulosa</i>	<i>Pinus montana</i>	<i>Robinia hispida</i>
<i>Arctostaphylos uvaursi</i>	<i>Pinus montana mughus</i>	<i>Robinia kelseyi</i>

<i>Cypripedium</i> , in variety	<i>Orchids</i> , in variety	

## PLANTS FOR SEASHORE CONDITIONS

IN PLANTING nursery stock near the shore it is advisable to select plants that will withstand the attacks of ocean winds and salt spray. Only comparatively resistant kinds are listed here. Many others will do well with slight protection.

<i>Abies concolor</i>	<i>Myrica carolinensis</i>
<i>Acer rubrum</i>	<i>Picea asperata</i>

## A COMPLETE HORTICULTURAL AND LANDSCAPE SERVICE AT KELSEY-HIGHLANDS NURSERY

Customers of Harlan P. Kelsey, Inc. will find our various branches of service of real value thruout the year. Some special features of this service are described below.

1. **RENOVATION OF GARDENS AND PLANTATIONS.** Overgrown or run down gardens can often be improved immeasurably by readjustment, pruning, fertilization, the addition of a few plants, etc. Let us help you make your garden more interesting and enjoyable.
2. **LANDSCAPE SERVICE.** Harlan P. Kelsey, Inc. offers a skilled service devoted to the creation of finer landscapes. After a careful study of each individual problem we recommend a development which will fit the particular location so as to combine beauty and convenience with economy of construction and maintenance. Our background of sound designing and horticultural experience assures such results. No charge is ordinarily made for a preliminary conference at our office, or on the grounds where most effective results are ordinarily obtained. If however considerable time or distance is involved a minimum charge is made to cover costs.
3. **HEDGES, WINDBREAKS AND SCREENS.** The growing of fine material for evergreen and deciduous hedges, windbreaks and screens is a specialty at Kelsey-Highlands Nursery. For protection from harsh winds, for masking unsightly views and to insure privacy the larger screens are often invaluable. Lower hedges and borders are pleasing essentials in many garden designs. We will gladly submit recommendations and quotations for individual problems. A far wider list is available for these uses than is generally supposed. For example, few realize that the native White Pine, which in our woods grows to over 100 feet in height, responds readily to pruning and will make if desired a permanent low hedge or border as small as 1 foot in height or a tall impenetrable windbreak of any reasonable dimensions.
4. **MOVING LARGE SPECIMEN TREES.** Our tree-moving equipment is especially designed for safely transplanting large Evergreens or Shade Trees up to almost 1 foot in diameter. We have many handsome specimens of Pine, Hemlock, Spruce, Fir and Shade Trees in wide variety from 10 to 30 feet in height. These are moved with large balls with little disturbance to the root systems, largely eliminating risks. For transplanting large trees on private estates our charge for tree-moving machine and two operators is \$35.00 per day; additional labor or materials at our usual rates.
5. **PLANTINGS FOR BIRDS.** Birds add beauty and song to the garden, and are of greatest value in curbing insect damage. Every garden should include plants that provide natural bird food and cover. We know what these plants are and will gladly help you plan their proper use. Birds are a constant joy and entertainment in the garden—a bird-feeding station in a corner of your garden dedicated to bird life will be a continuing delight.

6. **RARE AND UNUSUAL PLANTS.** For half a century Kelsey-Highlands Nursery has been noted for its rare and new plants. Among the introductions of Harlan P. Kelsey have been some of America's choicest ornamentals. These include Carolina Hemlock, Pinkshell Azalea, Korean Chrysanthemum and the Kelsey Korean Hybrids, Galax, Grays Lily, Carolina Rhododendron, White Carolina Rhododendron, Kelsey Catawba Rhododendron, Mountain Silverbell, Kelsey Locust and others. We grow many of the choicest introductions of the Arnold Arboretum, the U. S. Department of Agriculture, etc. To those who enjoy the adventure of trying lovely new and rare plants a visit to Kelsey-Highlands Nursery will prove a real thrill and an opportunity to choose from our many rare, new and seldom listed varieties.
7. **COLLECTED NATIVE PLANTS.** Roadsides, woodlands, banks, borders and the like are delightfully and permanently improved by a free use of our choice and beautiful native plants and flowers. Our list of hardy American bulbs, ferns, herbaceous perennials and low groundcover shrubs is extensive. Most of these can be supplied in strong cut "sods" or as individual clumps or plants. We supply any quantity and will gladly make up special carload prices when desired. See pages 21-66 for further information.

**PRICES** in this catalog cancel all previous lists and are subject to change without notice. Prices are at nursery, or f.o.b., East Boxford, Mass. Station, or loaded for truck delivery, and include all packing charges, except where special methods are requested or bulky or unusual shaped plants are involved.

**GRADE.** We supply a standard grade of stock, but when unusual specimen material is selected an extra charge will be made to fit the value.

**SHIPPING INSTRUCTIONS.** State whether by Freight, Express, Truck or Parcel Post and exact destination. Otherwise we use our best judgment, but assume no responsibility thereby. We deliver by truck all over New England and nearby States at reasonable rates.

**PLANT INSURANCE.** We assume no risk after delivery to Transportation Agency in good condition. As we have no control of plant material after it leaves our hands, we do not guarantee its life nor replace without charge. Where plantings are done by us we will insure plants for a given period at reasonable rates to fit the risk involved.

**LARGE TREES** will be transported by Tree Machine or heavy truck at reasonable cost, depending on size and distance of delivery.

**TERMS.** Cash with order, entitling you to 5% discount; or satisfactory reference from unknown customers. To established credit accounts we allow 30 days from date of invoice, charging 6% for accounts overdue.

**CLAIMS** for errors must be made on receipt of goods. Any mistake or fault on our part will gladly be rectified.

**FLAME AZALEA**  
*(Azalea calendulacea)*

The most regal of all species, native or exotic, and a noble representative of our rich Carolina mountain flora. See pages 23 and 63.

Photo by Herbert W. Gleason

**SARGENT CRAB (*Malus sargentii*)**

A true dwarf Flowering Crab, really a spreading low shrub seldom over 8 feet in height. A profusion of white flowers followed by persistent red fruit are characteristic even in the smaller sizes. See Page 35.

Photo by Herbert W. Gleason

**CATAWBA RHODODENDRON (*Rhododendron catawbiense*)  
CREEPING BLUETS (*Houstonia serpyllifolia*)**

The hardiest and best all-round Rhododendron. Color, bright red-purple but with considerable variation. Leaves dark shining green. The Creeping Bluet is a choice Carolina mountain flower for bank or rock garden. See pages 18, 55 and 64.

**KOREAN CHRYSANTHEMUM (*Chrysanthemum coreanum*)**

A choice introduction of Harlan P. Kelsey. For descriptions and prices of this and the amazing new Korean hybrids see pages 51 and 52.
